

Claims

What is claimed is:

1. A nickel- and palladium-free 14-karat white gold alloy composition, consisting essentially of the following parts by weight: about 58.34% gold, about 35-40% silver,
5 about 0.5-1.80% tin, and 0.1-0.75% germanium.

2. A nickel- and palladium-free 14-karat white gold alloy composition having excellent workability properties, good corrosion-resistance properties and a bright white color that can be produced without the necessity of being rhodium-plated, consisting essentially of the following parts by weight: about 58.34% gold, about 39.66% silver, about
10 1.50% tin, and about 0.50% germanium.
